**USB-C Output for
External Devices**

Perfect for Solo Vlogging

Live Main Camera Feed on the Rear Display

With high-speed USB 3.1 direct connection, a single cable enables real-time video sync between your phone's rear camera and the external rear screen. Whether you're filming solo or vlogging on the go, you can confidently frame your shots and capture professional-quality content with ease.

3.97 INCH

Real-Time Monitoring

Live Detail on the 3.97" Screen

Equipped with a 3.97-inch screen, this live-streaming companion monitor gives creators a clear, intuitive view of every detail. Enjoy real-time image previews that help you fine-tune your composition and elevate your content with confidence.

Stable Magnetic Mounting

Plug In, Play Easy

Powered by advanced Type-C display technology, it delivers true plug-and-play convenience and compatible with most full-feature Type-C smartphones and computers. A dedicated magnetic bracket with a cold shoe and a 1/4 standard screw hole perfectly fits the phone, providing stable support.

Expand Your Connections

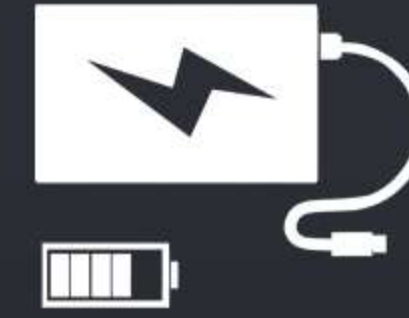

Mini HDMI for More Devices

Equipped with a built-in Mini HDMI port, this device supports HDMI high-definition video signal input and display. This means you can connect a wider range of HD devices like cameras, camcorders, and other HDMI-enabled devices, using it as an HDMI monitor.

The monitor supports power input from an external power bank. This setup can simultaneously charge both smartphone and the monitor.

The monitor can be also directly powered by the smartphone's internal battery via the USB-C connection.

Power Your Way

Dual Power Options

Supports two power modes: one directly powered by the phone's internal battery, and the other powered by an external power bank to supply both the phone and the monitor simultaneously. This ensures seamless power collaboration in various scenarios such as outdoor live streaming, making it more convenient to carry and use.

Brighter Every Shot

USB-C Lighting Connection

Enhance your shooting setup with USB-C support for external lighting, elevate your photo and video quality in any environment.

Smart Data Access

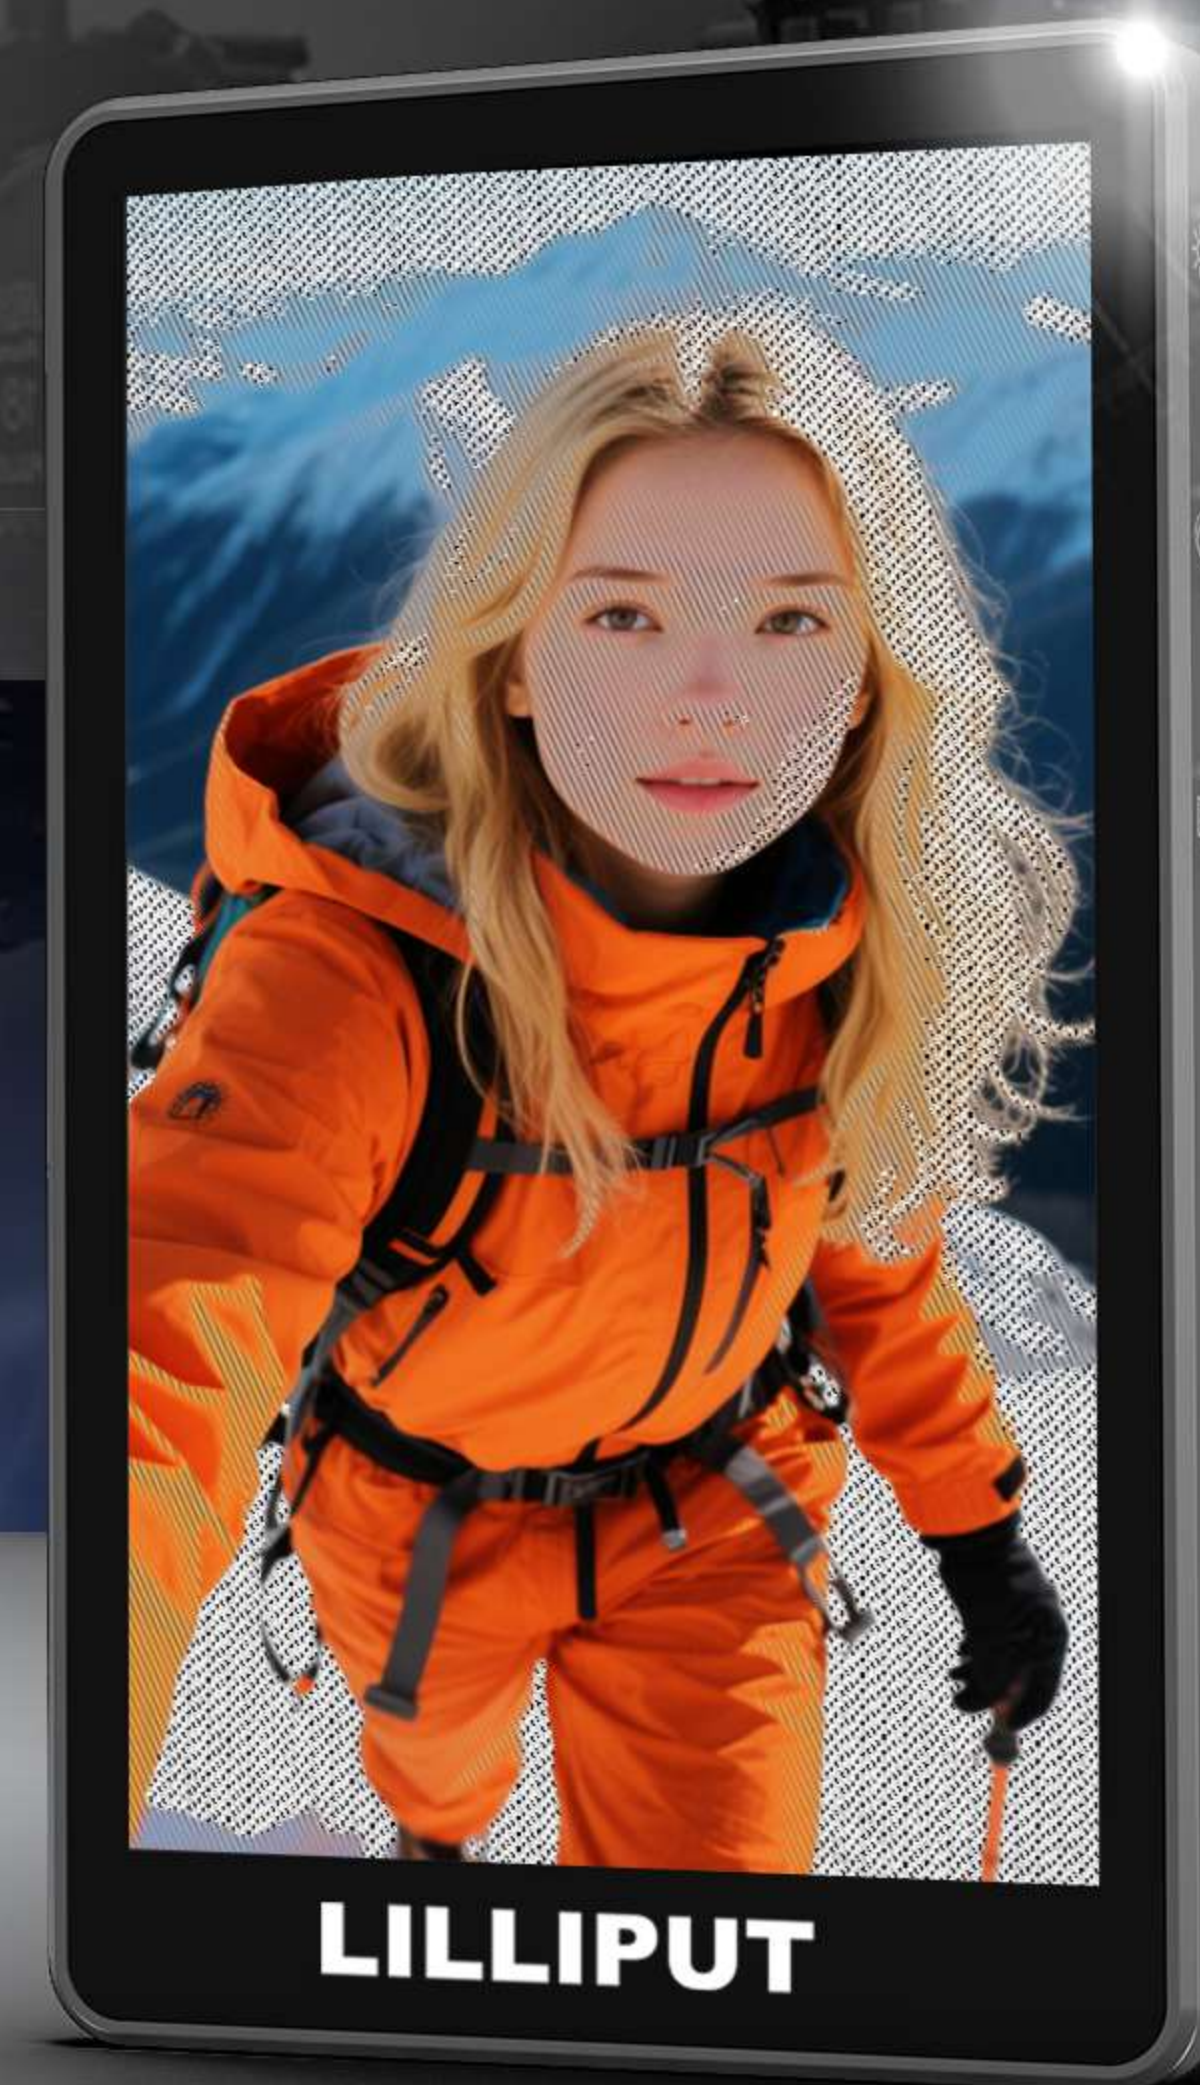

OTG USB Drive Support

The USB port supports OTG functionality, allowing your phone to read files directly from a connected USB drive. Easily access, view, and transfer data anytime, anywhere.

Expose with Precision

Zebra & False Color Modes

It supports professional exposure assistance features, including zebra stripes and false color modes, let you fine-tune brightness and contrast with precision—ensuring every shot is perfectly exposed.

Adapt to Every Scene

Flexible Screen Rotation and Ratio Adjustment

Seamlessly switch between 0°, 90°, 180°, and 270° screen orientations with just one touch. Combined with flexible aspect ratio options—original, full-screen stretch, and center crop—this display adapts to any shooting angle and composition style, giving you the ultimate monitoring experience.
